

DEVIKA N

Software Engineer | C#.NET & ASP.NET Core | Golang | SQL | Azure & AWS | RESTful APIs
Bengaluru, India | (+91) 8971506126 | devika192002@gmail.com | linkedin.com/in/devika-n-36511a238
Immediate Joiner

SUMMARY

Software Engineer with 2.5+ years of experience designing, developing, and maintaining production-grade backend systems, primarily in C#.NET and the .NET framework (ASP.NET Core Web API, Entity Framework Core, LINQ), with additional backend experience in Golang for cloud-native, serverless applications. Strong hands-on experience across relational and NoSQL datastores SQL Server query and stored procedure optimization, schema design, and MongoDB and building RESTful APIs and scalable microservices on both Azure (Azure Functions, Blob Storage, Azure DevOps, CI/CD) and AWS (Lambda, API Gateway). Comfortable across the full software development life cycle requirement analysis, design, coding, unit testing (xUnit), code reviews, and technical documentation and experienced troubleshooting production defects and collaborating with cross-functional teams and stakeholders in Agile/Scrum environments. Actively uses AI-assisted development tools (ChatGPT/Codex, Claude AI, Amazon Q) to accelerate development and documentation. Available to join immediately.

SKILLS

Programming Languages: C#.NET, Golang, SQL, JavaScript

.NET & Backend Frameworks: ASP.NET Core 6/7/8, ASP.NET Core Web API, MVC Architecture, Entity Framework Core, LINQ, RESTful APIs, Blazor POC, Web Services (JSON, XML)

Relational & NoSQL Datastores: SQL Server, MySQL, MongoDB, Stored Procedures, Triggers, Query & Stored Procedure Optimization, Relational Schema Design

Cloud & Cloud-Native: Azure Functions, Azure Blob Storage, Azure DevOps, AWS Lambda, API Gateway, AWS IoT Core, MQTT, Amazon S3, Docker, CI/CD, IIS, Serverless Microservices

Software Development Practices: Software Development Life Cycle (SDLC), Object-Oriented Design, Design Patterns, SOLID, Unit Testing (xUnit), Code Reviews, Technical Documentation, QA Collaboration

Security: JWT Bearer Authentication, OAuth2, AWS Cognito, Role-Based Access Control (RBAC), API Authorization

Frontend: HTML5, CSS3, JavaScript, Bootstrap, jQuery, React (basic/non-production exposure)

AI-Assisted Development: ChatGPT/Codex and Amazon Q for code generation, debugging, and unit testing; Claude AI, ChatGPT/Codex, and Amazon Q for technical documentation

Tools & Collaboration: Git, Bitbucket, JIRA, Swagger/OpenAPI, Postman, Agile, Scrum, cross-functional stakeholder communication

WORK EXPERIENCE

Software Developer | GND Solutions India Pvt Ltd, Bengaluru, India

Jan 2024 - Jul 2026

Robotic Power Management Tool | Client: ABB Robotics | C#, ASP.NET Core Web API, Entity Framework Core, SQL Server, xUnit

- Developed 15+ scalable RESTful APIs in C#/ASP.NET Core Web API following MVC architecture for robot controller booking, power consumption monitoring, and controller lifecycle management, serving multiple internal teams.
- Designed SQL Server database schemas, stored procedures, and triggers, and performed data migrations to support evolving business requirements while managing large volumes of operational data.
- Optimized SQL queries and Entity Framework Core operations to improve backend performance and reliability; wrote unit tests (xUnit) and collaborated with QA during validation and deployment.
- Deployed and maintained the application on IIS, providing production support, incident resolution, root cause analysis, and troubleshooting to minimize downtime.

Robot Web Services (RWS) Documentation Portal | Client: ABB Robotics | C#, ASP.NET Core Web API, Azure Functions, Azure Blob Storage, SignalR

- Built 8 Global Search Web APIs with filtering, pagination, and occurrence counting across large documentation datasets; integrated Swagger/OpenAPI specs for interactive API reference generation.
- Designed a version-based caching mechanism to reduce repeated Azure Blob Storage access and improve API response times, balancing usability with backend reliability.
- Collaborated with frontend developers and QA across desktop, tablet, and mobile platforms to deliver a consistent documentation experience.

Authentication & User Management Platform | Golang, AWS Lambda, API Gateway, AWS Cognito, MongoDB, Amazon S3

- Designed and maintained 28+ production-grade RESTful APIs across AWS Lambda-based backend services using API Gateway and AWS Cognito for secure authentication, SSO, and role-based access control (RBAC).
- Built APIs for user registration, login, role/sensor assignment, subscription validation, secure password reset, and account recovery workflows.
- Collaborated with a frontend developer and QA engineer to integrate authentication workflows across web applications; participated in code reviews using Git/Bitbucket to maintain code quality.

ThinxLog, ThinxLogger & ThinxLive (Web, Mobile & IoT APIs) | Golang, AWS Lambda, API Gateway, MongoDB, Amazon S3, MQTT, JWT

- Built 30+ secure, production RESTful APIs in Golang on AWS Lambda/API Gateway with JWT Bearer Authentication for web, mobile, and real-time IoT telemetry applications.
- Processed live device data over MQTT-based event-driven communication and integrated MongoDB and Amazon S3 for reliable storage of trip data, reports, and downstream analytics.
- Triaged and debugged production issues in the real-time data pipeline by analyzing root causes and system impact, using structured application logging to resolve delivery and connectivity failures.

KEY ACHIEVEMENTS

- Recognized by client leadership for proactive risk identification and communication in backend/SQL database management, praised as "crucial to project success" in preventing delays across a multi-team delivery.
- Recognized for delivering reliable backend and API solutions on enterprise robotics and IoT platforms through cross-functional collaboration with product, engineering, and QA teams.
- Strengthened delivery quality by combining API validation, structured responses, unit testing, debugging, and close QA coordination while actively using AI coding assistants to accelerate development and documentation.

CERTIFICATIONS

- Java Full Stack Certification - Tap Academy, Bengaluru
- Git and GitHub: Working with Git Repository - Infosys Springboard (Nov 2023)
- AWS Academy Graduate - AWS Academy Cloud Foundations - Amazon Web Services (Feb 2023)

EDUCATION

B. Tech / B.E. in Computer Science Engineering | AMC Engineering College, Bengaluru
2019 - 2023 | CGPA: 8.35/10
